

Thermostat HC30M

HC30M is a manual thermostat with on/off function and temperature setting. The temperature of the floor is controlled by a floor sensor, which is a part of the delivery. For your convenience, the temperature button has temperature indications.

The thermostat switches on and off in a controlled cycle, depending on whether the temperature is above or below the preset value.

Features

- Main switch
- Temperature setting
- Temperature control through a sensor

Technical Data

Voltage	230 V ~ 50-60 Hz
Maximum load	14 A
Protection Class	IP21
Temperature span	10 - 60 °C
Tolerance sensor	+/- 1.5 °C@10-30 °C
Sensor	Floor - 3 m wire
Sensor type	NTC 10kΩ at 25 °C. Double insulated
Terminals	1.5 mm ² - 4.0 mm ²
Warranty	3 years
Authorisation	CE
