

## Thermostat TM-1773

### Thermostat for larger outdoor areas.

TM-1773 is used for economic control of ice and snow melting for small/bigger applications. When humidity is detected the thermostat turns on the snow melting system. The sensitivity of the thermostat can be adjusted. It is easy to program by using the digital display

The moisture sensor is placed in the gutter or in the ground. As soon as it measures humidity and low temperature, the thermostat will activate the snow melting system. The snow melting system is only active, when the temperature drops below the selected setting, and the sensor measures moisture (snow and ice).

TM-1773 have the option of DIN installation.

## Technical Data

Voltage	230 V AC, 50 Hz
Temperature range	-20/+5°C
Timer afterrun	0-10 hours
Output relays	1 x 6 A resistive load
Alarm	SELV 24V/15mA
Temperature range (ambient)	0/+50°C
IP Class	IP20
Weight	400 gr.
Dimension (hxwx d)	88x107x60 mm
Warranty	5 years

## Thermostat TM-1773

Item no.	Description	IP Class
52200000	Thermostat TM-1773	IP20
