

Thermostat HC30-15

HC30-15 is a manual thermostat with on/off function, temperature setting and built-in temperature limiter. You can choose three different ways of controlling the floor temperature: floor sensor alone, room sensor alone or a combination of floor sensor and room sensor. For your convenience, the temperature button has temperature indications.

The built-in temperature limitation is a useful feature, as manufacturers of wooden, parquet and laminate floors stipulate that the maximum temperature on their floors should not exceed 27 °C.

Features

- Main switch
- Temperature setting
- Temperature limitation
- Temperature control through a sensor

Technical Data

Voltage	230 V ~ 50-60 Hz
Maximum load	16 A (3 A inductive)
Protection Class	IP21
Temperature span	10 - 60 °C
Tolerance sensor	+/- 1.5 °C@10-30 °C
Sensor	A. floor B. room C. floor + room
Sensor type	NTC 10kΩ at 25 °C. Double insulated
Terminals	1.5 mm ² - 4.0 mm ²
Warranty	3 years
Authorisation	CE

Thermostat HC30-15

Item	Type	Description	Load	IP Class	Frame System
53301500	HC30-15 BJ	Thermostat Busch Jäger frame	16 A	IP21	Busch Jäger
53301500	HC30-15 ELKO	Thermostat ELKO frame	16 A	IP21	ELKO
53301502	HC30-15 ELJO	Thermostat ELJO frame	16 A	IP21	ELJO
