

THERMOSTAT HC60

Digital, programmable and adaptive heating

HC60 contains the necessary functions to fulfil the demands set out in Ecodesign Lot20.

The thermostat is programmable, has adaptive heating and open window function. The control of the floor heating is then easily adapted to fit the needs in different rooms.

A temperature limiting function is included, ideal for use together with wooden or engineered floor boards.

The temperature is measured through floor sensor, room sensor or the 2 in combination.

The floor sensor with 3m cable and the built-in backup battery ensure that settings are maintained if power is lost to the controller.

TECHNICAL DATA

Supply voltage	90-240V / 50-60Hz
Max. load	3600 W (16A)
IP class	IP20
Temperature range	+5° C ... +40° C
Sensor settings	Floor / Room / Room with floor sensor as temperature limiter
Display	1,6" baggrundsbelyst LCD
Floor sensor	10 KΩ @25°C, længde 3m
Colour	White RAL9003
Installation	60 mm Euro vægdåse
Dimensions	82 x 82 x 53 mm
Warranty	3 years
Approvals	CE • RoHS • UKCA • Lot20 Ecodesign

FEATURES

- Backlit digital display
- Programmable – 6 events / day
- Adjust reading of room sensor
- Adaptive heating
- Open window function
- Temperature limiter
- Children safety function
- 3 sensor combinations
