

CABLE TESTER W. DISPLAY | CT2

The CT2 Cable Tester is designed for professional installers of electric heating cables and heating mats. It monitors the heating element during installation and helps detect faults before the system is embedded.

CONTINUOUS MONITORING DURING INSTALLATION

Helps detect damage to the heating cable as soon as it occurs.

EARLY FAULT DETECTION

Identifies cable breaks, insulation faults and unexpected resistance changes.

AUDIBLE ALARM AND CLEAR DISPLAY

Provides an immediate warning if a fault is detected.

REDUCES INSTALLATION RISK

Helps prevent damaged heating cables from being embedded in the floor construction.

EASY TO USE ON SITE

Compact, lightweight and simple to connect due to spring loaded terminals.

The CT2 is intended as a monitoring device and does not replace accurate measurements with a professional multimeter or insulation resistance tester.

TECHNICAL DATA

Battery type	9V - 6LR61
Operating time	125 hours
Terminal size	3 mm ²
Weight	95g
Size	130x39x24mm

Version 1-092026

Heatcom Corporation A/S
