THERMOSTAT

THERMOSTAT HC15

Manual and easy to operate

This thermostat for floor heating applications is easy for the user to operate.

The temperature in the room can be adjusted from the dial on the front panel and turned off also from the front panel.

Around the dial a graduated marking makes it possible to precisely set the temperature from which the thermostat adjusts the floor temperature.

The temperature of the floor is measured by a floor sensor that is part of the package.

Color is white RAL 9003 and will fit nicely into every room.

HC15 is applicable in all types of rooms and often preferred in rooms with shifting occupants (hotel, vacation housing, etc.) because of the easy operation.

ADVANTAGES

- Classic design
- Color will fit in every room
- Reliable operation

THERMOSTAT

THERMOSTAT HC15

Manual and easy to operate

This is a manually operated thermostat in classic design with mains switch on the front and precise setting of the temperature thanks to the graduation around the dial.

The temperature of the floor is measured by a floor sensor that also is part of the package.

Floor sensor has a cable length of 3 m.

The thermostat will turn the heating on and off if the measured temperature is below or above the setting of the dial.
